

0-10 Dimming LED Driver

SAFETY INSTRUCTION AND WARNING

- Installation should only be conducted by a qualified electrician in accordance with NEC and any relevant local building codes.
- Risk of fire or electric shock. Fixture installation requires knowledge of luminaires electrical systems.
- Be certain electrical power is OFF before and during installation and maintenance.
- Make sure the supply voltage is the same as the rated luminaire fixture voltage,
- Wear gloves and safety glasses at all times.

Installation

1

Step 1.

Unscrew and remove the enclosure's cover and remove knockouts for input and output.

2

Step 2.

Remove the caps on the drivers to be able to see the green color terminals.

3

Step 3.

Insert the Black wire (Line) and White wire (Neutral) from the panel into the driver and secure the screw.

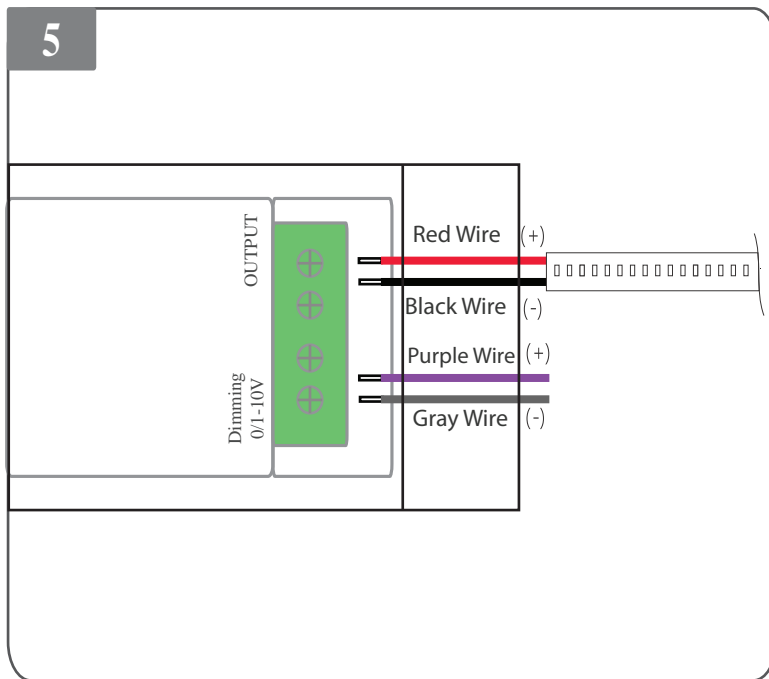

4

Step 4.

Fasten the wires from the LED strip into the output.

5

Step 5.

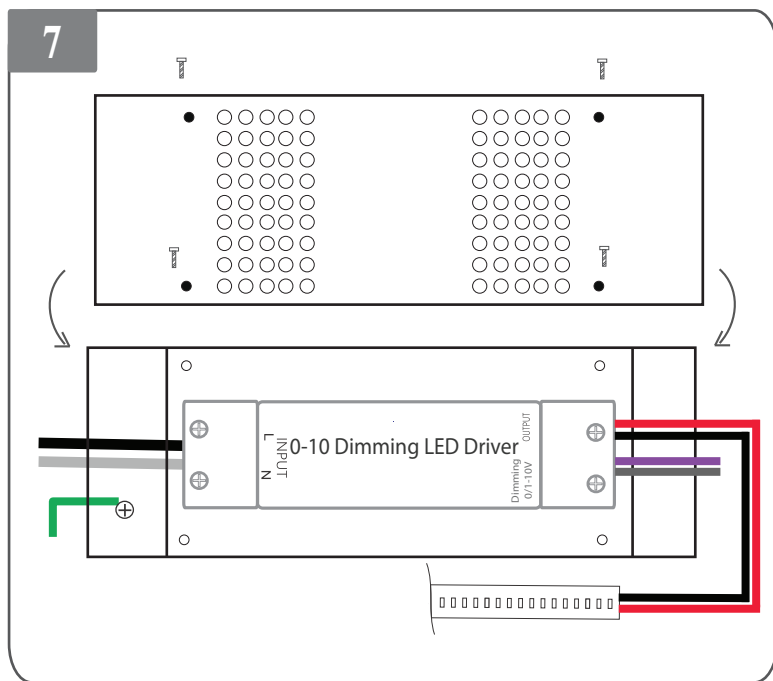

Insert the wires from 0-10 dimming controller into the driver and secure the screw.

6

Step 6.

Fasten the caps on the driver

Step 7.

Replace and screw down the enclosure's cover.

Step 8.

Finished !
