

# M8 + M4 – 5A

## Remote and controller

### Safety Instruction and Warning

WARNING:

#### READ CAREFULLY BEFORE INSTALLING.

Installation should only be conducted by a qualified electrician in accordance with NEC and any relevant local building codes.

Risk of fire or electric shock. Fixture installation requires knowledge of luminaire electrical systems. If not qualified, do not attempt installation. Contact a qualified electrician.

Be certain electrical power is OFF before and during installation and maintenance.

Fixtures must be connected to a wiring system with an equipment-grounding conductor.

Make sure the supply voltage is the same as the rated luminaire Fixtures voltage.

Wear gloves and safety glasses at all times when removing luminaire from carton, installing, servicing or performing maintenance.

## Remote and controller

### Step 2

Turn on the power supply. The red power indicator LED on the controller will start flashing that shows it is getting power.

### Step 3

Insert the wires from LED strip into correct channels and secure each terminal screw.

### Step 8

To pre-set, select the desired color and brightness then press and hold any number (1-7) for 2 seconds. Repeat for all buttons (1-7).

Confirm each color worked by pressing the number. If the color doesn't show what you selected, try again.

Once all 7 colors are programmed, correctly press the continuous button beside the number 7 to have it cycle through all the colors (note: all seven colors need to be programmed.)
