

SLC-026F

Diffusion LED Channel

Safety Instruction and Warning

WARNING:

READ CAREFULLY BEFORE INSTALLING.

Installation should only be conducted by a qualified electrician in accordance with NEC and any relevant local building codes.

Risk of fire or electric shock. Fixture installation requires knowledge of luminaires electrical systems. If not qualified, do not attempt installation. Contact a qualified electrician.

Be certain electrical power is OFF before and during installation and maintenance.

Fixtures must be connected to a wiring system with an equipment-grounding conductor.

Make sure the supply voltage is the same as the rated luminaire Fixtures voltage.

Wear gloves and safety glasses at all times when removing luminaire from carton, installing, servicing or performing maintenance.

Diagram

Description

Diffusion SLC-026F is a Sideways flexible channel that comes complete with mounting hardware for curved application.

Diffusion LED Channel

Installation Types

Notes:

Fixture should be built and installed based around the lengths of ribbon and power feed locations

Step 1

Using finished fixture length, determine spacing and placement of mounting clips or stainless mounting channel.

SLC-026F

Diffusion LED Channel

Step 2

Install mounting clips every 3-4 feet at a minimum.

If using stainless mounting channel, cut to desired length and install.

Step 3

Snap the finished fixture into mounting clips or channel, ensuring power feed is at the appropriate end.
